

Stone Creek Camp

featured in May 2009 Architectural Digest "Montana Compound"

EXCLUSIVE AFFILIATE OF
CHRISTIE'S
INTERNATIONAL REAL ESTATE

Amidst 15 forested acres on Flathead Lake lies Stone Creek Camp, a post modern Adirondack style compound inspired by the great camps of New York's Adirondack region and enhanced to meet modern sensibilities. With acute sensitivity to the land, the owner, architect and designer joined forces to create an

eco-friendly estate that enjoys 718 feet of Flathead Lake's pristine and breathtaking shoreline and a large dock system. The concept of indoor outdoor living has been utilized throughout the separately constructed yet well coordinated structures culminating at the main residence with cordwood walls and a sod roof. The guest house has three bedrooms, all with screened sleeping porches and private baths, a sitting area and a private kitchen. To drink in glorious nature, the lodge features exterior walls that slide away opening onto the stunning lake and forest that surrounds. The lavishly appointed kitchen building will accommodate a private chef or caterer. Nestled in the pines, the original fishing cabin has been charmingly refurbished for a touch of the old West. Two creeks and an underground water system support the naturalized water features and complement meandering trails lined with wildflowers and native bushes.
